

Modartt releases Pianoteq for iOS

After years of development in bringing the award-winning Pianoteq software to the world of handheld devices, Modartt is proud to present Pianoteq for iOS, provided as a standalone app and AUv3 compatible plug-in.

Pianoteq for iOS finally here

Years of development and thorough testing made it possible to take all the peculiarities of handheld devices into account in order to maximize productivity while retaining the app as stable and compatible as possible. The app runs even on older devices such as an iPhone 6s with iOS 15 or higher.

UI design

Current Pianoteq users will immediately feel at home with the iOS adapted user interface, resembling to the desktop version. You can use the integrated virtual keyboard or connect your device to an external MIDI compatible keyboard via an adapter or wireless via Bluetooth MIDI. The app can be used in standalone mode and as an AUv3 plug-in.

Cross-platform licensing

The iOS app comes as a free trial version of Pianoteq Stage, where instruments and product upgrades to Pianoteq Standard and Pro version can be evaluated. Current license owners of Pianoteq 8 can convert the app to the full version without charge. Pianoteq 8 can be used on iOS devices as well as on desktop computers and can be purchased through the app (in-app purchase) and from the Modartt website or authorized dealers.

Download and Try

Pianoteq for iOS is available for download and evaluation on the App Store. Further details with tutorials on how to get started are available on the website <https://www.modartt.com/>
